

EZ Black™

Eco-logic Feeds

Pre-ground Flake Diet

Product Description

EZ Black™ is an economical alternative to time-consuming flake diets used in post-larval culture systems. The diet is pre-ground to eliminate timely and wasteful activities required for feeding of hatchery flakes. **EZ Black™** has a dark color which provides for a darkened gut line to help monitor feeding activity and animal activity. The diet is also supplemented with **Vpak™**, an all-natural additive, to help increase resistance to vibrio and other diseases. As with all Zeigler diets, **EZ Black™** is formulated to contain no antibiotics and is manufactured according to ISO-9001 guidelines.

Features & Benefits

- ✓ Eliminates timely grinding required for hatchery flake diets
- ✓ Provides a darkened gut line to help monitor feeding level and animal activity
- ✓ Early detection system for underfeeding, stress, or disease without a microscope
- ✓ Contains **Vpak™** (Vitality Pak) to enhance disease resistance
- ✓ Ideal nutritional supplement for PL 1 to PL 15
- ✓ Formulated to contain no antibiotics

Product Application

Grinding not required. Feed at 20% or more of normal PL feeding regime to provide a distinctive dark coloration to the digestive tract. Coloration increases or decreases with PL's feeding activity. (See reverse for suggested feeding schedule.)

Product Specifications

- Particle Size: **EZ Black 300** (<300 microns)
EZ Black 500 (<500 microns)
- Packaging: 3 Kg (6.6 lb) pouches and 10.0 Kg Bucket (22lbs.)
- Shelf-life: Maintains nutritional value and shelf life up to one (1) year if properly stored and handled. Frozen storage extends shelf life beyond one (1) year.
- Storage: Store in cool, dry, well ventilated place away from sunlight. Rotate stock to use old product first ("first in, first out" principle).
