

Brine Shrimp Flakes– Black or Red

Brine Shrimp Flakes provide an economical alternative to our complete line of fine larval and post-larval feed products. They are designed to supplement the use of natural foods and other Zeigler larval diets. Zeigler Brine Shrimp Flakes are made from the best quality natural ingredients including a high level of brine shrimp. Hatchery flakes are fortified with complete vitamin and mineral packets and the amino acids required by shrimp larvae to achieve high survival and fast growth.

Particle Size

Flakes (Available in Black or Red)

Features & Benefits

One high quality formulation, two colors:

BLACK: optimizes coloration of digestive track in *P. vannamei*.

RED: provides desired tank coloration for culture of *P. monodon*.

- Yield fast growth by promoting healthy larval molting and high survival.
- Highly palatable and digestible.
- Contains high quality brine shrimp and squid.
- Contains proteinated trace minerals to improve biological availability.
- Contains extra levels of preservative and antioxidants to extend shelf life.
- Contains *Vpak* (Vitality Pak) to enhance disease resistance.

Guaranteed Analysis

Crude Protein	Minimum	50.0 %
Crude Fat	Minimum	13.0 %
Crude Fiber	Maximum	3.0 %
Moisture	Maximum	10.0%
Ash	Maximum	10.0 %

Ingredients

A nutritionally balanced highly digestible formulation of marine protein, plant protein (including algae), yeast, fish and vegetable oils, vegetable starches, vitamin and mineral premixes, anti-oxidants, pigments, and biodegradable binders.

Packaging

Boxes: 25 lb (11.3 kg) & 50 lb (22.7 kg)

Buckets: 11 lb (5 kg)

Product Application & Storage

- Designed to nurture Mysis through Post Larval (PL) stages of penaeid shrimp species.
- Best if used within one (1) year from date of manufacture.
- Store in a cool (22° C/72° F), dry, well-ventilated area away from sunlight.
- Rotate stock to use oldest product first (“first in, first out” principle).
