

Shrimp Starter 55-15

Shrimp Starter is designed to provide complete nutrition and rapid growth for post larval penaeid shrimp. High levels of protein, fat and vitamins along with an improved amino acid balance specially formulated vitamin packs, and selected carotenoid pigments provide optimal nutrition to developing post larval shrimp. Consistent uniformity in granules allows application to specific developmental stages.

Particle Size

- <600 microns
- 600-850 microns
- 850-1200 microns

Features & Benefits

- Enhanced HUFA (Highly Unsaturated Fatty Acids) content from high quality marine sources.
- Ingredients selected for their preferred quality, keen attractants, and proven digestibility.
- Nutritional reserves are rapidly available to assist in post larval acclimation during stocking.
- Highly attractive formulation that ensures rapid growth and low FCR.
- Facilitates the stocking of larger, healthier post larvae in ponds.
- Increased hatchery and pond survival.
- Microparticles are free of pathogenic bacteria.
- Contains *Vpak* (Vitality Pak) to enhance disease resistance.

Guaranteed Analysis

Crude Protein	Minimum	55.0%
Crude Fat	Minimum	15.0%
Crude Fiber	Maximum	2.0%
Moisture	Maximum	10.0%
Ash	Maximum	10.0%

Ingredients

A nutritionally balanced highly digestible formulation of marine and animal proteins, plant protein (including algae), yeast, fish and vegetable oils, vegetable starches, vitamin and mineral premixes, anti-oxidants, pigments, and biodegradable binders.

Packaging

Buckets: 16.33 kg (36 lb)

Product Application & Storage

- Designed for the complete nutrition and rapid growth for the post larval penaeid shrimp.
- Promotes healthy development, high survivability and a strong animal from the hatchery.
- Maintains nutritional value and shelf life up to twenty-four (24) months if properly stored and handled.
- Store in a cool (22° C/72° F), dry, well-ventilated area away from sunlight.
- Rotate stock to use oldest product first ("first in, first out" principle).
