

Product Description

Zeigler® **Biopak™** is a probiotic additive designed to improve water quality and reduce amounts of organic waste material in ponds. Probiotics are living organisms, that when administered in adequate amounts, provide a direct and/or indirect benefit to the host. **Biopak™** is environmentally safe and contains non-pathogenic bacteria selected to optimize pond sludge reduction. When consumed by animals, **Biopak™** will produce enzymes that aid in the digestive process.

Features & Benefits

- ✓ Helps to improve overall production yields
- ✓ Reduces B.O.D. to help maintain oxygen levels and overall water quality
- ✓ Reduces pond maintenance time and cost allowing for quicker pond turnover
- ✓ Produces a healthier environment which contributes to improved animal health
- ✓ All natural; contains no antibiotics

Technical Reports

- 60% reduction in sludge levels reported in shrimp pond trials
- 23% higher production yields demonstrated in ponds with **Biopak™**
- Shrimp have been shown to exhibit fewer black spots and are cleaner in overall appearance

Product Application

Application Rate: 0.05% or 500 grams per ton of feed
Directions: Top-dress on feed at pond side using molasses or oil. Depending upon process conditions, may be added to feed mix prior to pelleting (contact Zeigler for more information)
Duration: To be fed continuously

Product Specifications

Particle Size: Fine powder
Packaging: 50 lb. foil bag.
Shelf-life: Unopened packages have a shelf life of up to 2 years.
Storage: Store additive in cool, dry, well-ventilated area away from sunlight. Rotate stock to use old additive first ("first in, first out" principle).

Ingredients

Dried *Bacillus subtilis* fermentation product, calcium carbonate, rice hulls, mineral oil.
Concentration: 2.0×10^8 cfu/g
