

Product Description

Shrimp grower feed for *Penaeus monodon* is especially formulated to meet the nutritional needs of "tiger" shrimp. Zeigler Shrimp Grower *P. monodon* is presented in a unique feed matrix for cost effective feed management. The pond manager is able to select a protein level and feed size to fit the actual conditions of the pond for intensive and semi-intensive culture to ensure good FCR. Zeigler ISO Certified Quality Assurance Program ensures that you will receive a consistent, high-quality diet that will enhance the survival and growth of your animals. Zeigler's ingredient selection process assures *P. monodon* Shrimp Grower diet to be environmentally friendly with high digestibility to grow healthy and marketable shrimp.

	Guaranteed Analysis				
	Protein	Fat	Fiber	Ash	Moisture
	Min.	Min.	Max.	Max.	Max.
I Series (Intensive)	40,35,30, 25	6	3	12	14
SI Series (Semi-Intensive)	45,40,35,30,25	5	3	12	13

Pellet Size & Packaging

- ✓ 5/64" (2.0 mm)
 - ✓ 3/32" (2.4mm)
 - ✓ 1/8" (3.2mm)
 - ✓ Net Weight 55 lb (25 kg)
- Poly-woven Bags

Storage

Store feed in a cool, dry, well ventilated area. Rotate stock to use old feed first - "first in, first out" principle. Keep bags stacked on pallets to prevent feed from being in direct contact with damp floors.

Product Features

ISO Certified	Excellent quality consistently of both feed and service
Ingredient Selection	High-quality ingredients yield a high-quality product to enhance growth and survival. Zeigler has a strict protocol of testing for ingredients and finished product by an outside, independent laboratory
High water stability	Keep feed available for animal consumption (feeding)
Environmentally Friendly	A shrimp ration with high digestibility and reduced phosphorous and waste, yielding a low FCR
On-going R&D Program	Ensures that the customer benefits from the most up-to-date findings and improvements to the feed
Cost Effective	Improved FCR, higher survival, and better growth with the most economical choice from our feed matrix, which provides the pond manager with choices and to benefit from natural pond production
Manufacturing Process	Less heat maintains the integrity of heat sensitive ingredients which ensures good pellet quality & sinkability

Ingredients

Marine proteins, plant proteins, yeast by-products, vitamin and mineral supplements, Stay-C (a heat and water stable vitamin C), attractants, preservatives, and stabilizers.
