

Shrimp PL 40-9: Vpak

Shrimp Grower Feeds

Product Description

Shrimp growers report that the final survival of the crop depends to a great extent on animal performance during the first 30 to 60 days of life. A good start is very important when the animals are stocked and superior nutrition is a critical component for making this happen. Stocking small PL's in either nursery ponds or production ponds creates a high stress environment for the young animals. Frequently, natural food is limited in both quantity and quality. Zeigler Post Larval Mini Pellets are designed to reduce this stress and to provide needed nutritional insurance. They contain highly digestible well-balanced protein, important attractants, and extra levels of essential nutrients. All this results in improved growth and survival.

Features & Benefits

- ✓ This special formulation contains higher levels of protein, fats, vitamins and minerals, as well as other important nutrients and attractants specially formulated for small post larval and juvenile shrimp.
- ✓ Contains **Vpak™** (Vitality Pak), a proprietary premix which has been shown in field trials to enhance disease resistance and improve survivability.
- ✓ Quality feeds come from quality ingredients. Zeigler suppliers are all pre-certified and ingredients undergo continuous testing at independent laboratories.
- ✓ Manufactured in an ISO 9001:2008 Registered Quality Management System certified plant, which assures product consistency and quality.
- ✓ Environmentally Friendly-all ingredients are highly digestible with no low-cost fillers added.
- ✓ A well-proven product providing trust in its performance.

CONTAINS: **Vpak™**

Product Application

Feed Post Larval Mini Pellets to shrimp from PL 12 to 2 grams when being raised in nursery ponds or production ponds that contain some natural productivity. Not recommended for high density acclimation or nursery raceways, which are highly aerated and that provide little natural food. For the latter situations, or for small animals, refer to Zeigler acclimation products.

Product Specifications

- Particle Sizes:
- ✓ 1.0 mm Mini Granule @ 717,000 particles/lb or 1,577,400 particles/kg
 - ✓ 1.5 mm Mini Pellet @ 150,000 particles/lb or 330,000 particles/kg
 - ✓ 2.0 mm Mini Pellet @ 75,000 particles/lb or 165,000 particles/kg
 - ✓ 5/64" or 2.0 mm Standard Pellet @ 30,000 particles/lb or 66,000 particles/kg
- Packaging: The 1.0 mm Mini Granule and the 1.5 mm and 2.0 mm Mini Pellets are packaged in 44 lb (20 kg) poly woven bags. The 5/64" or 2.0 mm Standard Pellet is packaged in 55 lb (25 kg) poly woven bags.
- Shelf-life: Best if used within nine (9) months from date of manufacture.
- Storage: Store in a cool, dry, well ventilated area. Rotate stock to use old feed first - "first in, first out" principle. Keep bags stacked on pallets to prevent feed from being in direct contact with damp floors.

Guaranteed Analysis

Protein	Minimum	40.0%
Fat	Minimum	9.0%
Fiber	Maximum	3.0%
Moisture	Maximum	10.0%
Ash	Maximum	13.0%

Ingredients

Marine proteins, plant proteins, yeast processes, grain by-products, vitamin and mineral supplements, Stay-C (a heat and water stable vitamin C), attractants, preservatives, and stabilizers.
