Zeigler® Parrot Starter/Breeder is supplemented with additional vitamins and minerals to support egg production and growth of young birds. No dietary supplements are necessary. Several pellet

sizes are available to accommodate birds of all sizes, and the fruity flavor will attract even the most finicky of eaters.

Feeding Instructions:

Zeigler® Parrot Starter/Breeder should be fed 60-90 days prior to the onset of breeding to assure birds are receiving the necessary nutrients required for reproduction and egg development. Pellets softened with water and placed in a clean dish will aid in the adults feeding very young birds. Babies can also be hand-fed using Zeigler® Handfeeding Formula. When birds reach maturity, gradually switch to Zeigler® Parrot Maintenance.
